DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12 and 16-20, drawn to a transfer apparatus for a semiconductor process and a semiconductor process using said transfer apparatus is classified in class 118, subclass 715.
 - II. Claims 13-15, drawn to an accommodating apparatus for a semiconductor process, classified in class 118, subclass 729.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I represents a functional apparatus capable of processing a semiconductor without the complete subject matter of Group II. The subcombination has separate utility such as a transfer apparatus for optical devices.
3. Because these inventions are distinct for the reasons given above and the searches required for Group I and/or Group II are not required for Group III, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Joseph Scafetta on 09/20/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karla Moore whose telephone number is 703.305.3142. The examiner can normally be reached on Monday-Friday, 8:30am-5:30pm.
